Sunrise ePos live at de mArkt in het Felix Pakhuis

In April 2014, "de mArkt in het Felix Pakhuis", the new Fresh Food Market in Antwerp went live with its new Sunrise ePos. The Sunrise ePos solution is browser based, fully HTML5, responsive and supporting local storage which enables the shop to keep running even when the internet connection gets lost.

Johan Stoffels in his unique food concept store

De mArkt in het Felix Pakhuis

Felix Pakhuis is situated right in the middle of the historic harbour of Antwerp, overlooking the Willemdok and the MAS, where for hundreds of years all kinds of food products were handled.

Today, the Pakhuis houses a unique food concept store. The store offers the highest quality ingredients, culinary gadgets and cookware and original cookbooks.

Johan Stoffels

The co-founder of the store and owner of Quality & Matters Fresh Food Import is a long time user of the Sunrise platform. Sunrise enables him to manage his customers, products, stocks, sales and purchase orders in the cloud.

When in 2012 the concept store was opened, it was obvious to select the fully integrated Sunrise ePos as their Cloud POS.

Sunrise cloud platform

Sunrise is an ERP platform, with fully integrated software modules to manage OmniChannel retail operations. Sunrise is pure cloud, Software as a Service (SaaS).

All data and processes reside and run safe and secure in Sunrise data centers. Business continuity is guaranteed with continuous backup and replication services.

Sunrise is web-based, only a web browser is needed to run it. Sunrise software works on all devices like smartphones, smart TVs, tablets, laptop and desktop computers on operating systems like Windows, OSX, Linux, IOS, and Android.

Sunrise ePos

The Sunrise ePos is an integral part of Retail-In-Sync, Sunrise's OmniChannel solution. The ePos is integrated with warehousing and logistics, enabling booking of warehouse and delivery orders from the ePos. The stock levels in warehouses as well as shops are available real-time.

Thanks to local storage techniques the ePos will keep running even when the internet connection gets lost. Important advantages of the Sunrise ePos are:

- Keeps running when internet connection gets lost
- Secure cloud data storage, with continuous backup and replication
- Web-based, no need to install software
- Hardware independent
- Fast deployment
- Very scalable
- Synchronized with eShop and eKiosk solutions
- Fully integrated with content and customer management, order fulfilment and logistics
- Low TCO and high ROI

Selected hardware

Intensive use in retail operations requires very robust and well-designed user friendly and certified hardware. This that is why the **Wincor Nixdorf** Beetle iPOS+ was selected and delivered by **ScanSource**.
